Third-Party APIs — Jupiter Marine Frontend

1. Boats.com API

Purpose: General boat inventory/marketplace listings দেখানোর জন্য (`/search-listing` page এ)

Base URL: `NEXT_PUBLIC_BOATS_COM_API_URL`
Auth: `NEXT_PUBLIC_BOATS_COM_API_KEY` (query param হিসেবে পাঠায়)

Endpoints

Endpoint	Method	Description
`/api/boats-com`	GET	সব boats fetch করে (filter + pagination সহ)
`/api/boats-com/[id]`	GET	নির্দিষ্ট একটা boat এর details fetch করে

Supported Filters

Filter	Type	Description
`make`	string	Boat manufacturer (e.g. Viking, Hatteras)
`model`	string	Boat model
`year`	string	Year range — format: `2005:2010`
`price`	string	Price range — format: `50000:500000|USD`
`length`	string	Length range in meters — format: `5.00:20.00|meter`
`condition`	string	`New` or `Used`

Filter	Type	Description
`class`	string	Boat type/class (e.g. Sportfish, Cruiser)
`fuel`	string	Fuel type
`hull`	string	Hull material
`state`	string	US state
`country`	string	Country
`city`	string	City
`engines`	number	Number of engines
`cabins`	string	Cabin range — format: `1:5`
`heads`	string	Heads range — format: `1:3`
`beam`	string	Beam range in meters
`AdvancedKeywordSearch`	string	Keyword search
`sort`	string	Sort order (e.g. `LastModificationDate|desc`)
`rows`	number	Results per page
`start`	number	Pagination offset

All Boats — JSON Response Format

```
GET /api/boats-com

}
```

Project এ কিভাবে Use হয়

All Boats (`/search-listing` page)

`getAllBoats()` function call করে response এর `results` array থেকে প্রতিটা boat কে `YachtProduct` format এ map করা হয়:

```
{
  id: boat.DocumentID,
  brand_make: boat.MakeString,
  model: boat.Model,
  built_year: boat.ModelYear,
  name: boat.ListingTitle || `${boat.MakeString} ${boat.Model}`,
  location: `${boat.BoatLocation.BoatCityName}, ${boat.BoatLocation.BoatStateCode}`,
  price: parseFloat(boat.Price),
  image: boat.Images?.[0]?.Uri,
  link: `/search-listing/${boat.DocumentID}`
}
```

এরপর `ProductCard` component এ pass করা হয় listing grid এ দেখানোর জন্য।

Single Boat (`/search-listing/[id]` page)

`getBoatById(id)` call করে response কে `BoatDetails` format এ transform করা হয়:

```
{
  id: boat.DocumentID,
  title: boat.ListingTitle,
  price: `$${parseFloat(boat.Price).toLocaleString()}`,
  source: "boats.com",
  description: boat.GeneralBoatDescription.join('\n\n'),
  images: boat.Images.map(img => ({ uri: img.Uri })),
  specifications: [
    { key: "Make", value: boat.MakeString },
    { key: "Model", value: boat.Model },
    { key: "Year", value: boat.ModelYear },
    { key: "Length", value: boat.NominalLength },
    { key: "Beam", value: boat.BeamMeasure },
    { key: "Hull Material", value: boat.BoatHullMaterialCode },
    { key: "Fuel Capacity", value: boat.FuelTankCapacityMeasure },
    { key: "Total Engine Power", value: boat.TotalEnginePowerQuantity },
    { key: "Number of Engines", value: boat.NumberOfEngines },
    { key: "Heads", value: boat.HeadsCountNumeric }
    // ... আরো fields
  ],
  engines: boat.Engines.map(e => ({
    make: e.Make,
    model: e.Model,
    fuelType: e.Fuel,
    power: e.EnginePower,
    type: e.Type,
    year: e.Year,
    hours: e.Hours,
    location: e.BoatEngineLocationCode,
    propellerType: e.PropellerType
  })),
  videos: boat.Videos.url.map((url, i) => ({
    url,
    title: boat.Videos.title[i],
    thumbnailUrl: boat.Videos.thumbnailUrl[i]
  })),
  location: {
    city: boat.BoatLocation.BoatCityName,
    state: boat.BoatLocation.BoatStateCode,
    country: boat.BoatLocation.BoatCountryID
  }
}
```

এরপর `ItemDetailsComponents` এ pass করা হয় যেখানে gallery, specifications, engines, videos আলাদা আলাদা section এ দেখানো হয়।

Featured Boats (Homepage)

`getFeaturedBoats()` call করে `status=Active` দিয়ে সব boats আনে, তারপর `ModelYear` দিয়ে descending sort করে সবচেয়ে নতুন boats homepage এ দেখায়।

2. YachtBroker.org API

Purpose: Jupiter Marine এর নিজস্ব broker এর boat listings দেখানোর জন্য (`/florida-yacht-trader-mls` page এ)

Base URL: `https://api.yachtbroker.org`
Auth: `NEXT_PUBLIC_YACHTBROKER_API_KEY + NEXT_PUBLIC_YACHTBROKER_BROKER_ID`

Endpoints

Endpoint	Method	Description
`/api/yachtbroker/vessel`	GET	Broker এর boat listings fetch করে
`/api/yachtbroker/filters`	GET	Available filter options fetch করে

Vessel Endpoint — Default Params (always sent)

Param	Value	Description
`gallery`	true	Gallery images include করে
`engines`	true	Engine details include করে
`generators`	true	Generator details include করে
`textblocks`	true	Description text include করে

Param	Value	Description
`media`	true	Media files include করে
`status`	`On,Under Contract`	শুধু active listings দেখায়
`limit`	15	Per page results

Supported Filters (client থেকে forward হয়)

Filter	Type	Description
`page`	number	Page number
`search`	string	Keyword search
`category`	string	Boat category
`brand`	string	Manufacturer/brand
`model`	string	Boat model
`condition`	string	`new` or `used`
`year`	string	Year range — format: `2000,2024`
`price`	string	Price range — format: `50000,5000000`
`loa`	string	Length range — format: `30,100`
`loatype`	string	Length unit — `ft`
`cabins`	string	Cabin range — format: `1,5`
`sort`	string	Sort — e.g. `price_usd,1` (desc) or `loa_feet,0` (asc)
`city`	string	City
`state`	string	State
`country`	string	Country
`currency`	string	Currency — `usd`

}
```

Project এ কিভাবে Use হয়

All Vessels (`/florida-yacht-trader-mls` page)

`getYBListings(page, filters, perPage)` call করে `V-Data` array থেকে প্রতিটা boat কে map করা হয়:

```
{
  id: String(boat.ID),
  brand_make: boat.Manufacturer,
  model: boat.Model,
  built_year: boat.Year,
  name: boat.VesselName || `${boat.Manufacturer} ${boat.Model}`,
  location: `${boat.City}, ${boat.State}`,
  price: boat.PriceHidden ? undefined : boat.PriceUSD,
  image: boat.DisplayPicture?.Large || boat.DisplayPicture?.HD
}
```

এরপর `ProductCard` component এ pass করা হয় listing grid এ দেখানোর জন্য।

Single Vessel (`/florida-yacht-trader-mls/[id]` page)

`getYBBoatById(id)` call করে response কে `BoatDetails` format এ transform করা হয়:

```
{
  id: String(boat.ID),
  title: boat.VesselName || `${boat.Year} ${boat.Manufacturer} ${boat.Model}`,
  price: boat.PriceHidden ? "Price on request" : `$${boat.PriceUSD.toLocaleString()}`,
  source: "yachtbroker",
  description: [boat.Description, boat.Summary, boat.NotableUpgrades]
    .filter(Boolean)
    .join('\n\n')
    .replace(/<[^>]*>/g, ' '),  // HTML tags strip করা হয়
  images: boat.gallery.map(g => ({ uri: g.Large || g.HD })),
  specifications: [
    { key: "Make", value: boat.Manufacturer },
    { key: "Model", value: boat.Model },
    { key: "Year", value: boat.Year },
    { key: "Length", value: `${boat.DisplayLengthFeet} ft` },
    { key: "Beam", value: `${boat.BeamFeet}' ${boat.BeamInch}"` },
    { key: "Hull Material", value: boat.HullMaterial },
    { key: "Fuel Type", value: boat.FuelType },
    { key: "Category", value: boat.Category },
    { key: "Condition", value: boat.Condition },
    { key: "Engines", value: boat.EngineQty },
    { key: "Cabins", value: boat.CabinCount },
    { key: "Heads", value: boat.HeadCount },
    { key: "Max Draft", value: `${boat.MaximumDraftFeet} ft` }
  ],
  engines: boat.Engines.map(e => ({
    Make: e.Make,
    Model: e.Model,
    Year: e.Year,
    Hours: e.Hours,
    FuelType: e.FuelType,
    Power: e.EnginePower,
    Type: e.Type
  })),
  location: {
    city: boat.City,
    state: boat.State,
    country: boat.Country
  },
  additionalInfo: [
    { key: "City", value: boat.City },
    { key: "State", value: boat.State },
    { key: "Country", value: boat.Country },
```

```
    { key: "Location", value: `${boat.City}, ${boat.State}` }
  ]
}
```

এরপর `ItemDetailsComponents` এ pass করা হয় যেখানে gallery, specifications, engines আলাদা আলাদা section এ দেখানো হয়।

Filters (`/florida-yacht-trader-mls` page এর sidebar)

`getYBFilters()` call করে filter options আনা হয় এবং `FilterListing` component এ dynamically populate করা হয়:

- `Categories.Power` / `Categories.Sail` → Class dropdown এ
- `Brands` → Brand dropdown এ (null values filter করা হয়)
- `Types` → Type dropdown এ
- `City` → City dropdown এ (null values filter করা হয়)
- `State` → State dropdown এ (`state.value` দিয়ে display, `state.value` দিয়ে filter)

Key Difference

	Boats.com	YachtBroker.org
Data Source	General marketplace	Jupiter Marine এর নিজস্ব broker
Page	`/search-listing`	`/florida-yacht-trader-mls`
Listing Type	Public marketplace listings	Broker-specific listings
ID Format	Numeric string (e.g. `"8765432"`)	Numeric integer (e.g. `98765`)
Price Format	String (e.g. `"4500000.00"`)	Number (e.g. `1850000`)
Images	`Images[].Uri`	`gallery[].Large` / `DisplayPicture`
Description	`GeneralBoatDescription[]` array	`Description` HTML string
AI Search	আছে (Ask AI + Show My Boat)	নেই
Filter Options	Static (hardcoded in frontend)	Dynamic (API থেকে আসে)

	Boats.com	YachtBroker.org
Pagination	`numResults + start` offset	`current_page + last_page`
